

**gas development:  
chevron's  
success story is  
nigeria's  
success story...**

Chevron Nigeria Limited's ("CNL's") gas development strategy aims to end routine gas flaring and build a profitable gas business through a portfolio of domestic and regional supply projects that fulfill the NNPC/CNL Joint Venture Domestic Gas Supply Obligation and support the Nigerian Gas Master Plan.

We have been the highest supplier of high quality domestic gas in Nigeria since 2015 and will continue to explore opportunities to maintain this position. We have since 2008 also reduced routine gas flaring in our operations in Nigeria by over 95%.

We led the development of the West African Gas Pipeline project through which Nigeria supplies gas to Benin Republic, Togo, and Ghana.

All these are proof that in the area of natural gas development, Chevron's success story is Nigeria's success story.
